SOLLEVA

SOLLEVA is a toilet lift designed for elder people and for anyone suffering from limited mobility for diseases or injuries; Solleva can really help these people to retain their autonomy in the bathroom safely and comfortably.

SOLLEVA is a medical device that can make up for certain physical limitations. This device can help eliminate some of the stress and strain on your joints when you go from sit to stand; just think for example how difficult and painful is for people with arthritis getting from sit to stand!

The toilet lift "Solleva" made by Piuma Lift is available in 3 different types.

Mechanically and aesthetically they are the same; they only differ from each other for the feeding:

. LUXURY Battery power

This type is particularly fit for domestic and private use as it is not supplied by mains current.

. ARMONY

Supplied by mains current 230 v.

This type is suitable for users who do not want to care of battery charging.

. ROYAL *Supplied by mains current 230 v. + buffer battery.*

This type is particularly suitable for users who do not want to care of battery charging, being granted anyway the full working even in case of temporary power failure.

DIMENSIONS: Width 62 cm; depth 56 cm (seat in lower position); height (standard seat) 47 cm (on request, feet extension up to 8 cm are available); weight 34,4 kg.

Maximum height from ground: 95 cm
(seat maximum upper position)

Solleva has been proved to be particularly suitable for people affected by Multiple Sclerosis, osteoarthritis, rheumatoid arthritis, hips prostheses, heart problems, obesity.

Eliminates the risk of injuries caused by manual handling.

No need of masonry.
1 hour to be installed.
Fit almost any type of toilet.

Adjustable

- The seat can be stopped in any position you want between the minimum and the maximum height allowed. The arms (standard supplied) can be reclined backwards to allow user more freedom to move.

Anatomic

- *Solleva* moves up and down gently and slowly reproducing the natural moving of our body.
- *Solleva* reduces or even eliminates the need to be assisted by auxiliary personnel.

Noiseless

Thanks to **two lifting silent actuators**, self-lubricating axle-bearings, sound-proofing carter coating, the lift *Solleva* is highly noiseless.

Clean

Particular attention has been paid to the design of *Solleva*. It is not only very nice but it is also very easy to be kept clean, thanks to its **smooth, clear surfaces**. In addition, the coating is painted with special high-temperature scratchproof paintings.

The user, standing in upright position and simply leaning on the toilet seat, is gently lowered and then raised, **effortless, safely, independently**, while always keeping his feet on the ground.

Reasons to choose "SOLLEVA" by Piuma Lift

- SOLLEVA is conforming with EC directives as a medical device belonging to class 1 (as per Italian laws). **It is certified CE.**
- SOLLEVA design results from important ergonomic studies; for this reason this device has the highest degree of functionality, practicality as well as a fashionable look style
- SOLLEVA has been studied, designed and entirely manufactured in Italy employing the best productive technologies, as well as using the best material and components.
- SOLLEVA has been designed and manufactured by MIBA Srl (Modena, Italy), active for 40 years in the production of electromedical devices.

Arms

Arms (standard supply) are ergonomic-shaped to guarantee the highest comfort and **confidence** to the user.

Up-down buttons control are made of two light buttons easily operated while keeping holding the arm. Up-down buttons control can be either on right or left arm according to user's request.

On the arm supplied with up-down buttons control, you can also find the on-off button. Even this button is light to guarantee the highest safety.

Battery

Luxury works by means of a lithium-ion battery that guarantees a very long endurance (50 to 80 cycles according to user's weight); it takes about 3 hours to recharge the battery. However, *Luxury* is supplied with two batteries thus allowing a continuous operation. The battery replacement is very very easy and fast (see picture on the left); this operations only takes a few seconds.

NO wires

50-80 LIFTS
with full load battery

Thanks to battery power, *Luxury* has no electric wires.

Standard supply

Luxury Model
